VII Sem B.Tech Regular/Supplementary Examinations

Subject Code: 21CSCSP703C/21CACAT7010/21CDCDP703B

Max. Marks: 70

Max. Marks: 70

		BT1	COs	Marks	FOK
1	a	Discuss about entropy, gini index and information gain with an example.	K2	CO1	[7M] PS0, PS02, PO3, PO4
	b	Explain the various kernel methods that could be deployed in a model.	K2	CO1	[7M] PS01, PS02, PO1, PO2, PO3
2	a	Differentiate between boosting and bagging with an example.	K2	CO1	[7M] PO1, PO2, PO3 PS02,
	b	How do you evaluate the ML model? What are the metrics used to evaluate?	K2	CO1	[7M] PS02, PO2, PO4, PO5
3	a	How weights and bias play a vital role in the ANN? Give an example.	K2	CO2	[7M] PO1, PO2, PO3 PS01, PS02
	b	What are the non-linear activation functions that could be used in a network?	K1	CO2	[7M] PO1, PO2 PS01
4	a	If a model is found to be overfitting, what all the measures could be adopted?	K2	CO2	[7M] PO2, PO3, PO4 PS02,
	b	Enumerate the factors that affect the neural network.	K1	CO2	[7M] PO1, PO2, PS01, PS02
5	a	State all pre-processing techniques that could be applied during the binary classification of sentiment analysis.	K1	CO3	[7M] PO1, PO2, PO3 PS02,
	b	Compare and contrast Theano and Tensorflow with examples	K2	CO3	[7M] PO1, PO2 PS02

OR				
6	Is it possible to solve the XOR problem with a simple neural network with one input and one output layer? Describe in detail about the anatomy of the neural network with an example.	K3	CO3	[14M]
				PO1, PO2, PO3 PS01, PS02
7	Explain a simple CNN architecture with a neat example.	K2	CO4	[7M]
				PO1, PO2, PO3 PS01, PS02
b	List the various pooling operations that could be performed in CNN.	K2	CO4	[7M]
				PO1, PO2 PS01
OR				
8	Describe the types of RNN with an example.	K2	CO4	[7M]
				PO1, PO2 PS01, PS02
b	Identify the difficulties that might be encountered during the RNN training. Explain in detail.	K2	CO4	[7M]
				PO2, PO3, PO4 PS02
9	How the discriminator and generator play the role in GAN?	K3	CO5	[7M]
				PO1, PO2, PO3 PS02
b	Training the GAN is found to be difficult from the other neural networks. Justify.	K2	CO5	[7M]
				PO2, PO4 PS02
OR				
10	Differentiate stemming and lemmatization with an example.	K2	CO5	[7M]
				PO1, PO2 PS02
b	How does a RBM works? How does it vary from Auto encoders?	K3	CO5	[7M]
				PO1, PO2, PO3 PS01, PS02

K* Indicates Blooms Taxonomy Level
